

# SocratesIQ

Complete brand system, positioning, and design documentation

## Brand Positioning

---

### What We Own

**Category:** Curriculum Transformation Platform

**Hero Message:** "Transform Yesterday's Assignments into Tomorrow's Learning"

**Tagline:** "Wisdom in the Age of Artificial Intelligence"

**Core Insight:** Your curriculum already has value — we strengthen it.

### Why This Matters

Teachers don't need an AI generator. They need an AI resilience partner.

SocratesIQ transforms EXISTING assignments so students learn instead of shortcutting. This is different from lesson generators (which help teachers starting from scratch) or AI detectors (which assume the worst). We amplify good teaching.

## Competitive Edge

**Transformation, not generation.** We work WITH the teacher's existing curriculum, not replace it. We measure resilience (0–100 AI Resilience Score™), diagnose failure modes, and suggest specific changes tied to actual pedagogy — not just "use more critical thinking."

**Built by a teacher, for teachers.** No startup jargon, no false precision, no invented data. We own the limitations and speak like a peer.

## Brand Values & Principles

---

### Teacher Trust First

We don't pretend. No invented stats, no fake testimonials, no magic. Teachers are experts; we're a tool.

### **Honest About AI**

We use AI openly. We show what it can and can't do. We're not trying to hide the AI or pretend it's magic.

### **Practical Not Theoretical**

Real assignments, real classrooms, real feedback loops. Grounded in pedagogy, not just research citations.

### **Teacher-Centered Tone**

We speak to the peer, not down to the customer. No marketing hype, no jargon, no false urgency.

# Messaging Hierarchy

---

## Tier 1: Primary Message (Always lead with this)

**"Redesign assignments so AI can't do the work for students."**

Why it works: Clear job-to-be-done, honest about the problem, no fluff.

## Tier 2: Supporting Messages (Explain the how)

**Score & Diagnose:** Paste an assignment → get a 0–100 AI Resilience Score and a breakdown of what AI can do to it.

**Three Redesign Levels:** Quick Fix, Rebuild, or full Reinvent—each with concrete changes a teacher can use immediately.

**Align & Plan:** Upload your standards, auto-generate a lesson plan and student directions. All downloadable as PDF, Word, or Google Docs.

### **Tier 3: Proof Points (When asked "does this actually work?")**

**Research-informed:** Approaches informed by pedagogical research on AI's impact and assignment design (Furze et al. 2024 pilot among others).

**Before → After:** Teachers applying a redesign can re-analyze and see the score improvement in real time.

**Free to start:** 2 free assignments in trial mode. Paid plans start at \$9.99/month (15 assignments) or \$99.99/year. No credit card to try.

# AI Strategy Names & Philosophy

---

Teachers choose ONE at the start of an analysis. All downstream outputs (redesigns, lesson plan, student directions) flow from this choice.

## AI-Free Learning

"No AI involvement allowed—students prove competence without any generative tool."

**Redesign goal:** Remove any human-like output or research task that AI could shortcut. Expect: hands-on activities, presentations, lab work, collaborations, live discussions.

**Lesson plan guidance:** Students work independently; teacher focuses on live feedback and real-time problem-solving.

## AI-Assisted Learning

"AI is a tool, not a crutch—students use it under guardrails to speed up research or drafting."

**Redesign goal:** Teach students to use AI thoughtfully. Add verification steps, synthesis tasks, and reflection. Expect: students cite AI sources, fact-check outputs, reflect on process.

**Lesson plan guidance:** Teacher explicitly teaches AI norms—when it's allowed, what to ask it, how to verify, when to go deeper manually.

## **AI-Integrated Learning**

"AI is a collaborator—students learn **THROUGH** working **WITH** generative tools on complex problems."

**Redesign goal:** Tasks that are impossible or impractical without AI. Expect: iterative AI partnerships, comparing AI strategies, prompt engineering, analyzing AI failures.

**Lesson plan guidance:** Focus shifts to metacognition—students learn what AI is good/bad at and why. Teacher facilitates, not controls.

# Target Audience: The Skeptical Teacher

---

## Who We're Talking To

**The teacher saying:** "AI is overhyped. My students are already cutting corners. I need to protect rigor and authenticity."

**Pain points:** Assignment quality is dropping; students are using ChatGPT; current tools either ignore AI or surrender to it; no nuance.

**Aspirations:** Stay relevant without losing her standards. Help students learn to work WITH AI, not hide from it. Save time on grading without sacrificing feedback.

**Her framework:** She trusts peer experience more than marketing. She wants honesty about what will and won't work. She's skeptical of "AI transformation" hype but open to practical tools built BY teachers.

## How to Speak to Her

- **Lead with classroom truth:** "Here's what AI actually does to your assignments, and how to stop it."
- **Show your work:** Real score examples, real teacher feedback, real before → after assignments.
- **Own the limitations:** "We don't solve everything. Here's what we DO solve."

- **Make it time-free to try:** 2 free assignments, no email harvesting, just instant feedback.
- **Respect her expertise:** We suggest; she decides. We don't prescribe THE answer.

## Color System

---

A deliberate editorial palette: warm paper, deep-navy ink, slate-blue accents. No corner gradients or AI-default pastels.

### Primary & Accent

Primary

Deep Navy

#0E1626

RGB(14, 33, 38)

Deep text, headers

**Accent**

**Slate Blue**

#3E5C86

RGB(62, 92, 134)

Links, CTAs, eyebrows

## Background & Neutrals

**Background**

**Warm Cream**

#F4EFE4

RGB(244, 239, 228)

Page background

**Card**

**Off-White**

#FCFAF4

RGB(252, 250, 244)

Cards, containers

**Secondary**

**Light Beige**

#EAE3D5

RGB(234, 227, 213)

Muted backgrounds

**Border**

**Subtle Border**

#DED6C7

RGB(222, 214, 199)

Borders, dividers

## Semantic Colors

**Success**

## Success

#2F7D5B

RGB(47, 125, 91)

## Warning

## Warning

#C0892E

RGB(192, 137, 46)

## Destructive

## Destructive

#B0442E

RGB(176, 68, 46)

## Teal Accent

## Teal

#708D81

RGB(112, 141, 129)

High resilience

## Dark Section Palette

For full-bleed editorial "ink" sections that contrast with warm paper:

**Ink Primary**

**Deep Navy**

#0E1626

RGB(14, 22, 38)

**Ink Secondary**

**Navy Accent**

#141E33

RGB(20, 30, 51)

**On Ink**

**On Ink Text**

#ECE7DB

RGB(236, 231, 219)

**Ink Accent**

**Accent on Ink**

#A9C1DF

RGB(169, 193, 223)

# Typography

---

## Typeface: Sora

**Primary font for all text.** Sora is clean, modern, and works equally well for body copy, eyebrow labels, and headings.

Headings retain the `.font-serif` class for treatment (font-weight 600, letter-spacing -0.02em) but render in Sora, not a serif.

**Fallback stack:** Sora, Inter, Helvetica Neue, Arial, sans-serif

## Type Scale

HEADING 1 (56PX, WEIGHT 600)

# Page title, hero

HEADING 2 (36PX, WEIGHT 600)

## Section header

HEADING 3 (22PX, WEIGHT 600)

### Subsection

EYEBROW (11PX, WEIGHT 700, UPPERCASE, LETTER-SPACED)

SECTION LABEL

BODY (16PX, WEIGHT 400)

Standard paragraph text with warm, editorial voice.  
Clean but not clinical.

**SMALL (14PX, WEIGHT 400)**

Smaller text for captions, metadata, secondary information.

## Letter Spacing

**Headings:** -0.02em (tight, editorial feel)

**Eyebrow labels:** 0.2em (open, uppercase)

**Body:** normal (default)

## Voice & Tone

---

**Teacher-focused, honest, practical.** SocratesIQ speaks like a colleague who teaches, not like a startup. We own the limitations. No invented stats, no marketing hype, no em dashes.

### ✓ Do This

Teach first, pitch second  
Use real examples from classrooms

### ✗ Don't Do This

Invent statistics or vague studies  
Use corporate jargon or em dashes

Say what the work actually is

Own the limitations

Write like you speak to a peer

Show before → after examples

Cite the research, then own the pedagogy

Promise easy solutions

Pretend you're not using AI

Write like a marketing department

Use fake testimonials or staged photos

Claim we solve everything

## Terminology

**Do say:** redesign, rebuild, AI-resilient, assignment, lesson plan, you decide, transform, authentic

**Don't say:** leverage, synergy, transform (in startup sense), disruption, game-changer, effortless, revolutionary

## Key Components

---

### Score Circle

Displays resilience score (0–100). Used in assignment analyzer. Bordered circle with gradient top stroke.

72

AI RESILIENT

140px diameter, 4px solid #E7E0D2 border, gradient stroke: #3E5C86 → #0E1626 at top. Box shadow: 0 12px 30px -12px rgba(14, 22, 38, 0.25).

## Highlight Box

Used to emphasize key terms or phrases inline:

The three redesigns show different levels of change — Quick Fix, Rebuild, or full Reinvent.

Background: rgba(192, 137, 46, 0.18). Border-bottom: 2px solid #C0892E. Padding: 3px 6px. Inline element.

## Eyebrow Label

### REDESIGN STRATEGIES

All caps, letter-spaced 0.2em, color #3E5C86. Used above section headings to signal category.

## Borders & Radii

**Border radius lg:** 16px (cards, major components)

**Border radius md:** 12px (buttons, input fields)

**Border radius sm:** 6px (small elements)

**Border color:** #DED6C7 (subtly warm, not harsh)

## Dark Section Pattern (Editorial Rhythm)

---

Full-bleed sections with deep navy background create visual rhythm on the page. Use sparingly for emphasis.

### Color Overrides for Dark Sections

Background: #0E1626 (Deep Navy)

Text: #ECE7DB (On Ink)

Accents: #A9C1DF (Ink Accent)

Cards on ink (.ink-card): #141E33 with 1px  
rgba(255,255,255,0.07) border

# Marketing & Copy

## Guardrails

---

These are critical for teacher trust. Breach them and the whole brand erodes.

### ✓ Always Do

Use real teacher testimonials  
(anonymized by role/grade only)

Show actual assignment before → after examples

Credit research you reference (even if not a formal citation on the site)

Explain what the score measures and how

Acknowledge AI's actual strengths and limits

Speak to pedagogy, not just tech

### ✗ Never Do This

Invent statistics ("87% of teachers say...", "300+ institutions")

Use AI-generated fake people or staged classroom photos

Claim we solve AI problems that we don't

Name specific researchers or studies we don't cite

Promise "easy" solutions or "effortless" teaching

Position as a replacement for teacher judgment

Use em dashes or overwrought marketing copy

# Logo & Imagery

---

## Logo Usage

The owl mark (Abstract Owl design) is the primary logo. Use consistently across all platforms. Never stretch, skew, rotate, or change colors.

**Minimum size:** 48px (digital), 1 inch (print)

**Clear space:** Maintain 20px breathing room on all sides

## Imagery Style

**Aesthetic:** Editorial, warm paper, real classrooms. Think handwritten notes, pencil sketches, actual assignments.

**Do:** Use real teachers, real student work (anonymized), actual classroom settings, authentic moments

**Don't:** Stock photos of smiling people, staged corporate settings, bright artificial colors, AI-generated people

## Photography Overrides

When layering text over images: use #3E5C86 (slate blue) or #0E1626 (navy) semi-transparent overlays for readability. Avoid harsh contrast.

# Do's & Don'ts Summary

---

## ✓ Do This

Use the owl consistently  
(Abstract design)

Pair #0E1626 (navy) with  
#3E5C86 (slate blue)

Keep layouts clean,  
warm, editorial

Center the teacher's  
voice and expertise

Show real work and real  
classrooms

Use Sora throughout

Maintain warm paper  
aesthetic

Lead with  
transformation, not  
generation

Speak to the skeptical  
teacher

## ✗ Don't Do This

Change, stretch, or  
rotate logo

Use Geometric Owl  
design

Mix with bright,  
unrelated colors

Crowd content or over-  
decorate

Use marketing hype or  
corporate speak

Use fake or staged  
imagery

Add custom fonts  
unnecessarily

Add corner gradients or  
AI-default pastels

Invent data or  
testimonials

Claim we solve  
everything

# Brand Assets & Contact

---

**Logo files:** PNG (transparent), SVG, PDF

**Color palette:** All hex and RGB values above

**Typography:** Sora (via Google Fonts)

**This document:** Single source of truth for brand guidelines
